## Filter Media Loss?

---

# Causes, Solutions, & Innovations

# 01

## Understanding Media Loss

Filter media loss can compromise water treatment efficiency.

Common causes include improper retention systems or inadequate backwash processes, leading to wasted resources and reduced performance.

# 02

## Orthos' Solutions

Orthos offers guaranteed granular media retention utilizing our Ortho-Wash™ baffled troughs.

These troughs improve backwash efficiency by allowing air-water cleaning to continue as long as necessary.

# 03

## Key Benefits

These systems help retain granular media, reduce operational failures, and optimize long-term system reliability.

This results in lower maintenance costs and improved system longevity.

# 04

## Proven Results

Orthos' innovative designs save clients money by addressing these issues proactively, ensuring durability and enhanced water filtration.

Our solutions provide long-term reliability, preventing costly operational disruptions.

# Ready to Eliminate Media Loss?

***Stop Media Loss Before It Starts***

Partner with Orthos for proven solutions that keep your filters performing.
